Experience Summary

With over 5+ years of expertise, I am a Mobile Engineer who thrives in dynamic, fast-paced environments. My passion lies in crafting exceptional user experiences, leveraging a deep understanding of product functionality, and nurturing a creative mindset that extends far beyond just writing code.
My journey includes steering teams to design captivating user interfaces, integrating complex client-server and SQL/NoSQL systems, and developing internal tools that fortify the creation, management, and evolution of mobile solutions. My commitment to user-centric innovation has consistently propelled me to bring more than technical expertise to the table. in every project, my focus remains steadfast on not just how the product functions, but how it feels and can be improved, ensuring that the end-user's satisfaction is at the heart of every solution I engineer.

Technical Proficiencies and Experience Highlights

- Proficient in the Software Development Life Cycle (SDLC), with a strategic approach that ensures robust project planning, execution, and delivery.
- Extensive experience in Flutter, encompassing development, debugging, profiling, optimisation, and streamlining the build process, ensuring the creation of efficient, high-quality mobile applications.
- Proficient in a spectrum of Object-Oriented Programming languages, including Dart, Python, C, and Java. This versatile skill set enables effective problem-solving and a deep understanding of programming principles.
- Well-versed in Continuous Integration/Continuous Delivery (CI/CD) tools specific to Flutter development, ensuring seamless and efficient app development workflows.
- A seasoned navigator of app stores, with in-depth knowledge of Google Play Store and previous Flutter app releases, meeting stringent platform-specific requirements.
- Proficient in utilising version control software, especially Git, to maintain codebase integrity and enable seamless collaboration with development teams.
- Mastery in crafting unique, eye-catching UI components for Flutter applications, ensuring a visually captivating and engaging user experience.
- Adept at bridging the gap between engineering and marketing, having actively participated in both areas. This dual perspective has enriched my understanding of fundamental business procedures, contributing to more holistic and effective solutions.

Professional Experience

Senior Mobile Engineer | Vent Africa (Vent - Nigeria, Remote)
(July 2022 – Present)
Vent Africa is an automated crypto trading platform that provide cash in exchange of crypto. At Vent Africa, I contributed to the development of a responsive and secure mobile app. My responsibilities and accomplishments in this role include:

- Translated high-fidelity mockups into responsive mobile code, ensuring an aesthetically pleasing and intuitive user interface.
- Implemented a robust notification system to enhance user engagement, delivering real-time updates and alerts for an enriched user experience.
- Strengthened app security by proactively identifying and addressing vulnerabilities, ensuring the safety of user data and transactions.
- Optimized the user experience by introducing caching mechanisms, reducing load times, and enhancing overall app performance.
- Introduced a detailed report feature, empowering users with comprehensive insights into their transactions, providing transparency and facilitating informed decisions.
- Collaborated closely with cross-functional teams, including designers and backend developers, to ensure seamless integration of features and a cohesive user experience.

- Actively participated in the app's continuous improvement, bringing innovative ideas and solutions to enhance its functionality and user satisfaction.
- I have also significantly improved the verification flow by implementing criteria checkpoints before users can proceed with certain actions. Additionally, I introduced a customizable dark and light mode feature in the app, providing users with enhanced browsing options tailored to their preferences.

Senior Mobile Engineer | HIZO (Hizo- Nigeria, Remote)

(2023 – 2024)

During my tenure at HIZO, I was involved innovating and implementing solutions to enhance the mobile app's functionality, security, and user experience, ultimately contributing to the company's mission of facilitating seamless financial transactions across Africa. Here are some key highlights of my accomplishments:

- Led the development of a sophisticated rate engine for currency conversion, ensuring accurate and real-time exchange rates for seamless transactions.
- Spearheaded the implementation of features enabling users to deposit funds into their HIZO wallets and seamlessly transfer money across Africa via bank transfers or mobile money services. Additionally, facilitated easy withdrawal to bank accounts.
- Built a robust referral system to incentivize user engagement and growth, fostering a community-driven approach to user acquisition and retention.

Senior Mobile Engineer | De9jaSpirit Talent Hunt (DTH - Nigeria, Remote)

(February 2022 – 2024)

De9jaSpirit Talent Hunt is a show organized to discover and showcase amazing talents. As a Senior Mobile Engineer at De9jaSpirit Talent Hunt, I have been instrumental in enhancing user engagement and interactivity on the platform. I integrated live streaming, reactive posts, and built a robust polling and voting system, all contributing to a dynamic and engaging user experience. My responsibilities and accomplishments in this role include:

- Integrated live streaming functionality, enabling real-time talent showcases and enhancing user engagement.
- Developed the capability for users to react to posts, whether they contain text, images, or video content, fostering dynamic interaction.
- Designed and implemented a robust polling system that allows users to participate in polls, boosting user engagement and interaction.
- Engineered a comprehensive voting system.
- Collaborated closely with cross-functional teams, including product designers, backend engineers, and marketing, to ensure the app delivers the best possible user experience.
- Implemented an ad display algorithm that maximizes ad revenue without compromising user experience.
- Translated high-fidelity mockups into responsive mobile code, maintaining a high standard of UI/UX design.
- Integrated push notifications using Firebase Cloud Messaging, enhancing user engagement and interaction.
- Introduced analytics to monitor user interactions, allowing data-driven improvements to the product.
- Successfully integrated payment gateways for voting, registration, and auction functionality.
- Established and managed a robust CI/CD pipeline for efficient app builds and updates.

Lead Software Engineer and Software Architect | Raven Live Technology (Raven Live - Remote)

(February 2020 - 2024)

Raven is a live streaming and social networking app helping African creators earn globally. At Raven Livestream Technology, I have played a pivotal role in developing and architecting a cutting-edge live streaming and social networking app that empowers African creators to reach a global audience. My responsibilities and accomplishments in this role include:

- Ensured seamless real-time communication across all app components, creating a dynamic and interactive user experience.
- Contributed to the platform's appeal and competitiveness by offering instant and engaging features.
- Collaborated with business analysts, users, and the QA team to maintain high-quality implementations and address any bug fixes promptly.
- Ensured the market quality of the platform and provided effective implementations and bug fixes.
- Spearheaded the development of crucial features, including a digital wallet system, ticketing functionality, live streaming enhancements, and chat features.
- These additions expanded the app's capabilities, driving user engagement, and revenue generation.
- Established and managed the CI/CD pipeline for efficient app builds, enabling regular updates and improvements.

- Ensured a streamlined development process, reducing time-to-market and enhancing the platform's competitiveness.
- Designed and implemented a real-time chat feature using Socket and SQLite, fostering engaging user interactions during live broadcasts.
- Ensured the chat feature was robust, responsive, and user-friendly, contributing to user satisfaction.
- Led the development and architecture of the live streaming feature, enabling high-quality, real-time video streaming on the platform.
- Collaborated with cross-functional teams to ensure seamless integration, optimizing the user experience during live streams.

Lead Software Engineer, Software Architect | Kudel Express (Kudel - Remote)

(December 2021 - 2022)

Kudel is a food delivery web and mobile application. During my time at Kudel Express, I've played a key role in developing and maintaining a responsive mobile application for food delivery My responsibilities and accomplishments in this role include:

- Translated high-fidelity mockups into responsive mobile code, ensuring a seamless and visually appealing user interface.
- Designed and developed the User, Vendor, and delivery apps, expanding the platform's capabilities.
- Implemented a robust notification system to keep users informed and engaged throughout their experience.
- Collaborated closely with business analysts, users, and the QA team to maintain high-quality implementations and promptly address bug fixes.
- Ensured real-time communication across all app components, creating an interactive and dynamic user experience.
- Actively contributed to strategic decision-making, offering insights and solutions to improve fundamental business procedures.
- Established and managed the CI/CD pipeline, streamlining the development process for efficient app builds and updates.
- Leveraged extensive experience in Dart and Flutter to create unique UI components, contributing to the platform's distinctive user interface.
- Collaborated with cross-functional teams to enhance the app's functionality and user satisfaction, including marketing efforts.

Education & Certification

BSc Computer Science | *University of Benin, Benin, Edo*
(2019- 2023)

JAVA and SQL| *National Institute of Information, Ikeja, Lagos*
(2018)

Skills & Interest

Skills:

- **Languages** Dart, Java , python,
- **Tools:** Android Studio, XCode, VSCode, Git , Figma, XD
- **Mobile Frameworks**: Flutter
- **Mobile DevOps**: Github Actions
- **State Management**: Riverpod, Provider, BLOC
- **Database**: Firebase, SQL, Mongo

Interest: Football, Teaching, Sketching, TED talks, Mentoring.
